

JONATHAN M. VELAZQUEZ

Cybersecurity Professional | Software Engineer Apprentice | Active Secret Clearance
Madison, AL | jlcmvelazquez@outlook.com | LinkedIn: linkedin.com/in/jonathan-m-velazquez

SUMMARY

Mission-driven cybersecurity professional and software engineer apprentice with 24 years of U.S. Air Force experience securing systems, modernizing mission platforms, and supporting high-value operations across multi-facility environments. Skilled in secure coding, system troubleshooting, IT asset management, VR/MR training systems, and mission-critical technical support. Advancing engineering depth through a U.S. Department of Labor Software Engineer Apprenticeship and a completed B.S. in Cybersecurity. Active Secret clearance.

SECURITY CLEARANCE

Active **Secret Clearance** - Fully transferable

CORE SKILLS

Cybersecurity: Security+, Secure Coding, Identity & Access Management, SOC Fundamentals, Vulnerability Reduction, Risk-Aware Decision Making

Technical: JavaScript, Node.js, Express, EJS, NoSQL (MongoDB, Redis, Neo4j), SQL (MySQL), Git, REST APIs

Systems & Ops: IT Asset Management, Hardware Lifecycle, Multi-User Support, VR/MR Systems, Configuration Management, Technical Documentation

Leadership: Operations Management, Workflow Development, Requirements Analysis, Stakeholder Coordination, Training Technology Support

TECHNICAL PROJECTS

Mission Portfolio Website - Node.js, Express, EJS, CSS

GitHub: <https://github.com/jonvelazquez/Personal-Portfolio>

Space-themed, defense-aligned portfolio featuring telemetry animations, orbital path motion, JSON-driven project system, and mission-focused UI.

Astro Weight Calculator - JavaScript

GitHub: <https://github.com/jonvelazquez/Astro-Weight-Calculator>

Interactive calculator computing a user's weight on different celestial bodies using physics-based multipliers.

Express Server API - Node.js, Express

GitHub: <https://github.com/jonvelazquez/Express-Server>

Backend server demonstrating routing, middleware, structured endpoints, and foundational API development.

VSTDA API - Node.js, Express

GitHub: <https://github.com/jonvelazquez/VSTDA-API>

REST API supporting task management operations with CRUD endpoints and structured data handling.

Log All the Things - Node.js

GitHub: <https://github.com/jonvelazquez/Log-All-the-Things>

Logging and debugging utility demonstrating structured output, error handling, and Node.js workflow automation.

Starship Traversal Experience - CSS

GitHub: <https://github.com/jonvelazquez/Starship-Traversal-Experience>

Immersive CSS-driven animation simulating starship traversal through space.

Space Systems Telemetry UI (Integrated Feature) - JavaScript, CSS Animations Integrated directly into the Mission Portfolio to simulate aerospace telemetry, animated signal lines, and orbital motion.

Cyber Defense Dashboard (Integrated Concept) - Node.js, Express, EJS Conceptual SOC-style dashboard displayed within the Mission Portfolio to demonstrate secure UI patterns and mission-focused design.

EXPERIENCE

Software Engineer Apprentice | Creating Coding Careers - U.S. Department of Labor Registered Apprenticeship | Remote, AL | March 2026 - Present

- Develop and maintain full-stack applications using JavaScript, Node.js, NoSQL, and Git.
- Diagnose and resolve software defects, integration issues, and configuration errors.
- Apply secure coding practices to reduce vulnerabilities and strengthen application security.
- Configure development environments, version control workflows, and backend services.
- Produce technical documentation supporting system maintenance and engineering workflows.
- Collaborate within Agile teams to plan sprints and deliver iterative improvements.

Section Chief, Operations Division | United States Air Force | Maxwell AFB, AL | August 2024 - Present

- Lead secure daily operations for AFCCC, ensuring compliance with cybersecurity standards.
- Manage deployment, accountability, and refresh of IT hardware across multiple secure facilities.
- Resolve hardware, software, and access-related issues affecting mission systems.
- Modernize VR/MR systems supporting cyber-aligned training environments.
- Maintain operational records and sensitive information per cybersecurity requirements.
- Develop SOPs, workflows, and documentation supporting system continuity.

Flight Chief, Education Division | United States Air Force | Maxwell AFB, AL | October 2021 - August 2024

- Directed secure training operations across 10 major commands.
- Managed instructional technology systems and distance-learning studios.
- Resolved hardware, software, connectivity, and system access issues.
- Produced operational reports and readiness documentation for leadership.
- Integrated IT-enabled tools into curriculum development and execution.

Additional USAF Experience (2002–2021)

Roles include NCOIC Religious Affairs, NCOIC Resource Management, Chaplain Assistant / Logistics Supervisor, and Security Forces Member.

Key contributions: secure facility management, asset accountability, contract oversight, emergency response, and mission continuity across multiple installations and deployments.

EDUCATION

Bachelor of Science (B.S.), Cybersecurity

American Military University - Completed: 10/2025

A.A.S., Social Services

Community College of the Air Force - Completed: 01/2013

A.A.S., Criminal Justice

Community College of the Air Force - Completed: 11/2012
